**Volume III of my Gann Astro Trading Methods** is now done and available to buyers of at least Volume I (because you need the software in that volume) and preferably volume II also, since this new work builds on the two prior books and discusses examples in the prior works. The cost is $430 for Volume III but if you have not purchased any prior volumes then the three volume set will be discounted to $1000 for all three when purchased at the same time.

Volume III is 80% horoscopes and 20% other advanced trading secrets like the Square of Nine, numerology and other miscellaneous topics. You will now be able to see how and why horoscopes work and why traders like W.D. Gann had complete confidence that a bull or bear market would start near a certain date. This work shows dozens and dozens of such forecasts of major market highs and lows that last for months to years all forecast from the correct starting horoscope and the unique application of key numbers in that horoscope. While writing this I demonstrated how and why the current 'Trump Rally' would likely end on March 1st, 2017 with a likely low in May. I also show clearly the exact cause of the November 2016 Election rally to the precise day and why Trump is connected to Ronald Reagan, along with a proof of many of the final top or bottom days of the bull and bear markets in history. You need not be an astrologer to follow this discussion on horoscopes as I look at them completely different than other astrologers and I show why the traditional methods don't work very well but that there are key numbers that you need to be aware of to crack the code of a horoscope. You can reproduce the examples in this volume with the software from volume I, however, I do recommend a professional astrology software package to make it easier if you devote a good part of your time to these methods. This is volume III for a reason- it is the culmination of the secrets of Gann and why he always knew without doubt where the beginnings and endings of markets and stocks would take place and these could be figured out for years ahead of time if you had the key and that key was embedded in the horoscope. While I love all my prior books and think they all have a place, clearly this one possesses the one key you need to find the really big moves for major swing trading and institutional entry and exit of markets at the terminal points. This approach is not for everyone and I won't say it is easy. It is not hard to comprehend and understand how to do it, but you do need to study this volume as it certainly is not a light read. It goes to the heart of the Bible and the origin of horoscopes and progressions and solar returns and how to make them work in the stock and commodity markets. Elaborate examples on soybeans are used to show how easy it is to trade commodities but also examples on the S&P, and stocks like AMZN and XON and others. There are three or four individual techniques that alone would pay for the cost of purchasing this volume many times over. You won't find these key clues to the horoscope in
other astro books or methods as they don't have the numerological secret cycles that make them work. If you are serious about learning how it all fits together as well as how your own life and horoscope work then this is a necessary purchase.

What follows are some of the forecasts in the book that you will finally be able to see completely and fully what caused them and how easy it was to know in advance if you had the right starting point. I also explain three different methods that are connected that gave you the 1929 top to the exact day.

Here is the famous bull market blast off in 1982 and I explain how a major recurring cycle from the Bible called the exact day months ahead of time.
The financial panic in 1998 gave you several key top cycles known for over 100 years so you could short the top at the exact point.

Did you sell Amazon at the top in 2007? With the knowledge from Volume III you might have!
A lot of money was made and lost on crude oil over the past few years. Did you know the EXACT days of the highs and lows? These were set up hundreds of years ago. Gann always said if you want good results you have to start at the right beginning point. Volume III shows you that point.

Do you trade commodities? This was a good long term entry on soybeans known for over 30 years.
In 1974 many thought the bear market would never end. This key cycle gave you the exact low and years later the exact high to the day of the greatest bull market in history!

TSLA is a great trading stock and knowledge of this cycle could have made you rich!
All the big institutions trade Exxon. What if you knew years ahead of time where the final lows would occur? This is a simple secret cycle from its horoscope explained in Volume III.

These are just a few of the examples in Volume III and you will learn how easy it was to find and calculate these cycles that will last forever. While these huge cycles don't come every day, with thousands of stocks to choose from and dozens of commodities it's not hard to find major swing trades all the time that you can plot out and be prepared for, once you learn the secrets of their horoscopes.

There are a great many more examples than these few representatives and this is my longest volume at 237 pages. If you apply the knowledge from this volume that will allow you to find these huge beginning points and then use the other techniques from my prior volumes to fine tune it and trade it, you should be able to become quite successful in the markets.

The table of contents follows as well as the ordering information:
